

International postgraduate course in Medical Response to Major Incidents (MRMI), Basic course combined with instructor course

Time: Basic course March 13- 15, 2019

Instructor course March 12-15, 2019

Location: Karolinska Hospital, Solna (Stockholm), Sweden

Local organizer: MRMI Sweden & Trauma Center, Karolinska Hospital, Stockholm

Design of the basic course

The course is based on an advanced simulation model (www.macsim.se), training the whole chain of response: Scene, transport, hospitals, coordination & command, including also training in triage and individual patient-management with participation of collaborating agencies like rescue service, police and protection agencies. The course is totally interactive, starting with one day of preparative training in groups, followed by two full days of simulation exercises with all participants active in their normal positions and with careful evaluation and analysis of the result of the response.

This requires a distribution of participants in accordance with the roles during the simulation exercise. In the standardized application form, the applicant has to indicate his/her preference and competence for the different roles and this may be used in the selection of participants.

Design of the instructor course

The instructor course is only open for applicants with diploma from an approved international basic course. After a preparatory day, instructor candidates serve as instructors on a simultaneous basic course under guidance and evaluation of senior faculty.

Language: English

Accommodation

Accommodation is not included in the course fee, but a list of available hotels on close range from the course venue, including low-price alternatives, can be provided by the organizer.
