

International postgraduate course in Medical Response to Major Incidents (MRMI), basic course

Time: Basic course October 04 – 06, 2019.

Location: Palma de Mallorca, Spain.

Local organizer: Hospital Comarcal de Inca, Mallorca, Spain.

Design of the basic course:

The course is based on an advanced simulation model (www.macsim.se), training the whole chain of response: Scene, transport, hospitals, coordination & command, including also training in triage and individual patient-management and with participation of collaborating agencies like rescue service, police and protection agencies. The course is totally interactive, starting with one day of preparative training in groups, followed by two full days of simulation exercises with all participants active in their normal positions and with careful evaluation and analysis of the result of the response.

This requires a distribution of participants in accordance with the roles during the simulation exercise. In the standardized application form, the applicant has to indicate his/her preference and competence for the different roles and this may be used in the selection of participants.

Language:

English
