

MASS CASUALTY INCIDENTS INTERACTIVE PRECONGRESS COURSE

ECTES Valencia
Saturday 5th of May 2018

Objectives

- To prepare the participants for a Mass Casualty Incident (MCI) from a medical perspective.
- To introduce the chain of actions in Medical Response to Major Incidents.
- To train decision making in mass casualties due to physical trauma.

Background

- An increased number of terror actions challenges our medical systems.
- There is a current demand to prepare our medical services for Major Incidents.
- The presented course will offer tools to prepare and organize before a Mass Casualty Incident.
